

ImageTech Connect Agents and Portlet for Cardiff LiquidOffice and TeleForm

ImageTech Systems as a premier Cardiff partner, has built custom Connect Agents and a Portlet for industry leading ECM platforms from IBM and EMC. These integrations allow customers to fully leverage an automated eForms solution, Cardiff LiquidOffice or a document scanning solution, Cardiff TeleForm with rich support for enterprise content repositories.

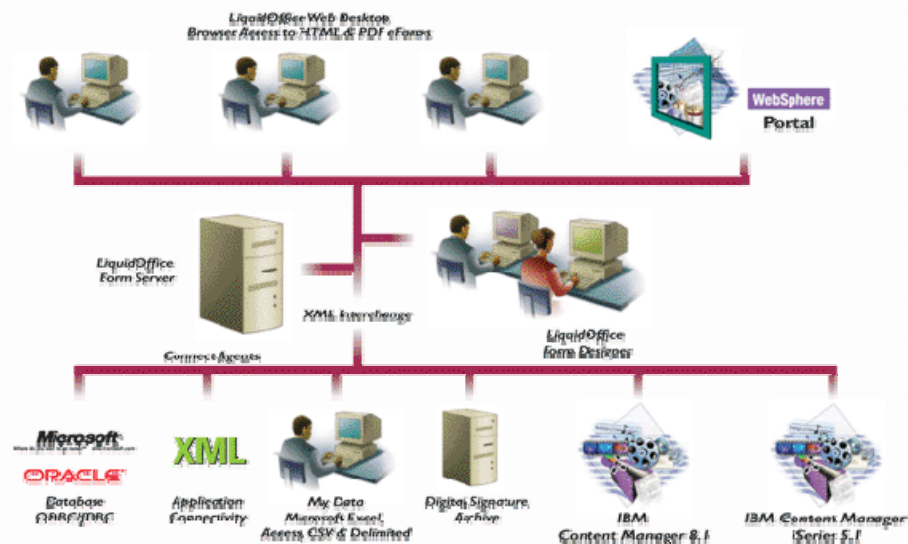

The ImageTech Custom Connect Agents and Portlet include:

- Cardiff LiquidOffice and TeleForm Connect Agents for IBM Content Manager
- Cardiff LiquidOffice and TeleForm Connect Agents for EMC Documentum
- IBM WebSphere Portal Portlet for IBM Content Manager

Cardiff LiquidOffice and TeleForm Connect Agents for IBM Content Manager

The Cardiff LiquidOffice and TeleForm Connects for IBM Content Manager provide the following features:

- Export forms, images and index data from TeleForm and/or LiquidOffice directly into IBM Content Manager
- Support for a single TeleForm or LiquidOffice server to release to multiple instances of IBM Content Manager
- Support for multiple export feature of TeleForm and LiquidOffice
- Easy-to-use interface for linking LiquidOffice and Tele Form Field values to IBM Content Manager Attributes
- Auto-Foldering Support in IBM Content Manager
- IBM Content Manager Document Routing Support

Cardiff LiquidOffice and TeleForm Connect Agents for EMC

The Cardiff LiquidOffice and TeleForm Connects for IBM Content Manager provide the following features:

- **Export capability** of images of completed forms, and form/index data from both LiquidOffice and TeleForm into your Documentum 5 system.
- **Dynamic Storage Locations** — Rather than specifying a static Documentum location for forms to be exported to, form fields can be used to create a storage hierarchy that dynamically assigns the storage location as the form is exported.
- **Repeating Attribute Support** — The LiquidOffice and TeleForm Connect Agents for Documentum support populating Documentum repeating attributes. (attributes which can contain more than one value)
- **Multiple export feature** allows for a single form to be simultaneously exported to multiple locations in the same Docbase, to multiple Docbases, or to other back-end/line-of-business applications.
- **Easy to use setup interface** available from the LiquidOffice and TeleForm Designers allows custom export settings to be specified for each individual form.

IBM WebSphere Portal Portlet for Cardiff LiquidOffice

The LiquidOffice Portlet for WebSphere Portal Server provides the following features:

- **Access to LiquidOffice** directly from within WebSphere Portal, thus allowing you to provide access to LiquidOffice in the same convenient, centralized location as many of your already existing applications.
- **LiquidOffice Inbox**, the general forms repository, form search capabilities, and form-routing are all conveniently accessible from within WebSphere Portal. Search for a form, or just browse the LiquidOffice forms repository directly.
- **Enterprise Scalability** — Utilizing the WebSphere Platform, and the Simple Object Access Protocol, the LiquidOffice Portlet provides direct access to the LiquidOffice Forms Server from within WebSphere Portal, regardless of the location of the LiquidOffice Forms Server.
- **Single Sign On** functionality can be managed by taking advantage of WebSphere Portal's Credential Vault, providing synchronization between LiquidOffice, WebSphere Portal, and an organization's network login.
